On the back of this sheet or on additional paper, complete one or more of these projects:

1. Draw a picture of you with your family member. Include other members of your family who are also related.
2. Write a story, describing in more detail the day you and your relative would spend together.
3. Research and create a **genealogy** map. Start with one generation past your family member and end with you.
4. Write a letter to someone from a future generation.
